

Global Scope

The Global Scope is designed for basic automotive and industrial applications which require a portable inspection device to capture video and images. The 8mm (.315) diameter probes feature a flex and stay, semi-obedient design to complete inspections in automobiles, pipes, walls, industrial machinery, plumbing, duct work, construction sites, as well many other hard to reach areas.

Exciting Features

- Image and sound recording of your industrial inspections saved to micro-SD memory card
- Led Lighting (adjustable)
- 5 x Digital Zoom of the inspection area.
- 78" / 2 meter working length
- Composite / Pal video output
- Battery powered 4x AA (run time 4-6 hours)
- Carrying case
- Optional items – mirror , hook, magnet

Professional tooling at a reasonable cost! FREE ground shipping to most US states
